About Oejbro...

They derive their inspiration from their incredible wildlife and landscape with all its variations. They love to add to the treasure chest of Nordic patterns with their own interpretations and use patterns and a colour palette on their mittens that **evoke a Nordic spirit**.

All of their patterns have a history, and they all begin in their mittens which they **knit with 100% Merino wool** and **line with modern Thinsulate linings** to achieve the **highest possible degree of comfort and function**. On request, they have even knitted matching socks for their beloved mittens. They knit our wool socks with the same patterns as their mittens, but with a slightly longer leg so that the pattern can truly be appreciated.

Öjbro Vantfabrik's mittens are distinguished by the various blends of patterns in **spirit-lifting colors**. Besides their unique designs, they are also **functional and suit anyone of any age**. With Öjbro Vantfabrik's **warm mittens and cozy socks**, you can look forward to a pleasant and enjoyable time.
