About Aveva...

We do what we love as long as we love it. That's how it started in 2011 and that's what keeps us going. We love colors, materials, functions, harmony and aesthetics. But most important, we love the human ability to create beautiful objects. We challenge traditional and natural materials, love color, long living object, craftsmanship and quality.

Materials: 100% wool, azo-free colors, certified wool, fsc-certified paper, recycled paper and organic cotton. 100% natural, renewable and biodegradable.

Size: 8.5" x 7"

Production

We believe that design creates a happier world. Throughout the whole design process our goal is to work as much local as possible, produce less and smart packaging, simply to reduce negative impact on our planet, but also to support craftsmanship in Sweden and around the world. Handmade products are an important part in our production. Therefore we carefully choose manufacturers and partners that share our values to ensure that they care as much as we do. In other words, to produce with environmental and social responsibility. We strive for honest relationships, joy for your eyes and products for the heart.

Here is a snapshot from our production in Kathmandu, 100% felted wool drying in the sun, using azo free colors from Switzerland and ecological wool from New Zealand. All put together by a social responsible factory supporting women at work.
